ACTIVITY IN YOUR SECTOR

IPO Climate Capital Weekly 2h
Battery storage firm surges 23% on first trading day

Funding Energy Intelligence 8h
Green hydrogen startup closes \$80M Series B

POLICY & DEADLINES

Grant DOE 5 days left
H2 Bridge Demonstration • \$14M deadline approaching

The network is already compounding.

We didn't start from zero. EP grew out of a working climate newsroom and a pre-built directory — so momentum showed up before we ever charged a dollar.

20+

Profiles claimed

by real founders & funds

+100/day

New readers

2,500+ in the last 30 days

100+

Countries reached

28 languages

400+

In sales pipeline

warm, ready to onboard

Five tools, one platform.

01

News intelligence

A daily, editor-curated feed of funding, policy, and deals in your sector.

02

Company directory

1,300+ climate companies, structured and searchable across 14 sectors.

03

Investor matching

350+ funds and angels profiles ready to be claimed and use the platform to source deals.

04

Grants tracker

185+ non-dilutive funding opportunities, sorted by deadline.

05

Hiring & experts

500+ roles and a network of vetted experts across the transition.

- All five – free until January 1, 2027

Build the habit first. Charge once the network is dense.

LinkedIn meets PitchBook meets Bloomberg — for energy.

One profile that doubles as your fundraise, your hiring page, and your newswire — sitting on a live market that everyone in the transition can search.

FOR COMPANIES

Own the profile the world sees.

- **Control your public profile** — the face of your company, fully yours to shape.
- **Raise capital** — get matched to investors actively deploying in your sector.
- Hire & find experts — post roles and reach talent across the transition.
- **Make announcements** — agreements, product launches and milestones, straight to the network.
- **Connect & promote** — find peers in your space and amplify your social channels.

FOR INVESTORS

See more, sort faster, reach anyone.

- See everything — Structured data on every company in the directory.
- **Sort your way** — rank by sector, stage, geography or raise size — any criteria you choose.
- **Connect in one click** — request a warm intro and open the conversation instantly.

1,300+
companies to browse

350+
funds & angels

Users don't onboard. They claim.

Most platforms die at the cold start — empty until someone builds a profile from scratch. We inverted it: the directory is already populated. A founder, investor, or director find their organization, claims it, and is live in minutes.

Every unclaimed page is a warm lead — and a reason for them to show up.

INVENTORY READY TO BE CLAIMED

Companies	1,300+
Investors	350
NGOs & grants	240+
Open roles	500+

→ Each one is a customer we don't have to convince to exist.

The front door: The Energy Pioneer.

A real climate newsroom is our distribution channel — the thing competitors would have to buy. It brings the audience; the platform converts it.

PARTNERS & COLLABORATIONS

We Don't Have Time

Climate News Now

UN Environment Programme

UN Development Programme

Green Climate Fund

Union of Concerned Scientists

From journalist to user.

Our reporters already reach founders, funds, and institutions for stories. That access — earned, not bought — is the top of our sales funnel.

01

We reach out as press

A reporter's email gets opened. We interview founders and cover their work.

02

We add their company

Their profile goes live in the directory — value delivered before any ask.

03

They claim & explore

They claim the page, customize it, and start using matching and news.

04

They convert

When paid launches, they're already active — a subscriber, not a stranger.

• Credibility of a news outlet → trust → conversion

Intelligence that earns the daily open.

Every user gets a feed curated by our editors — funding, IPOs, policy, and grant deadlines in their exact sector. They get value every day, whether or not they're raising or hiring.

Editor-curated, not an algorithm

A reason to return before they need us

09 • PRODUCT • THE NEWSROOM

Journalism is the top of the funnel.

The Energy Pioneer publishes daily across 28 languages and 100+ countries. Every story drives traffic, builds trust, and surfaces companies we can list — then sell to.

- Owned audience, zero CAC

Editorial credibility competitors can't fake

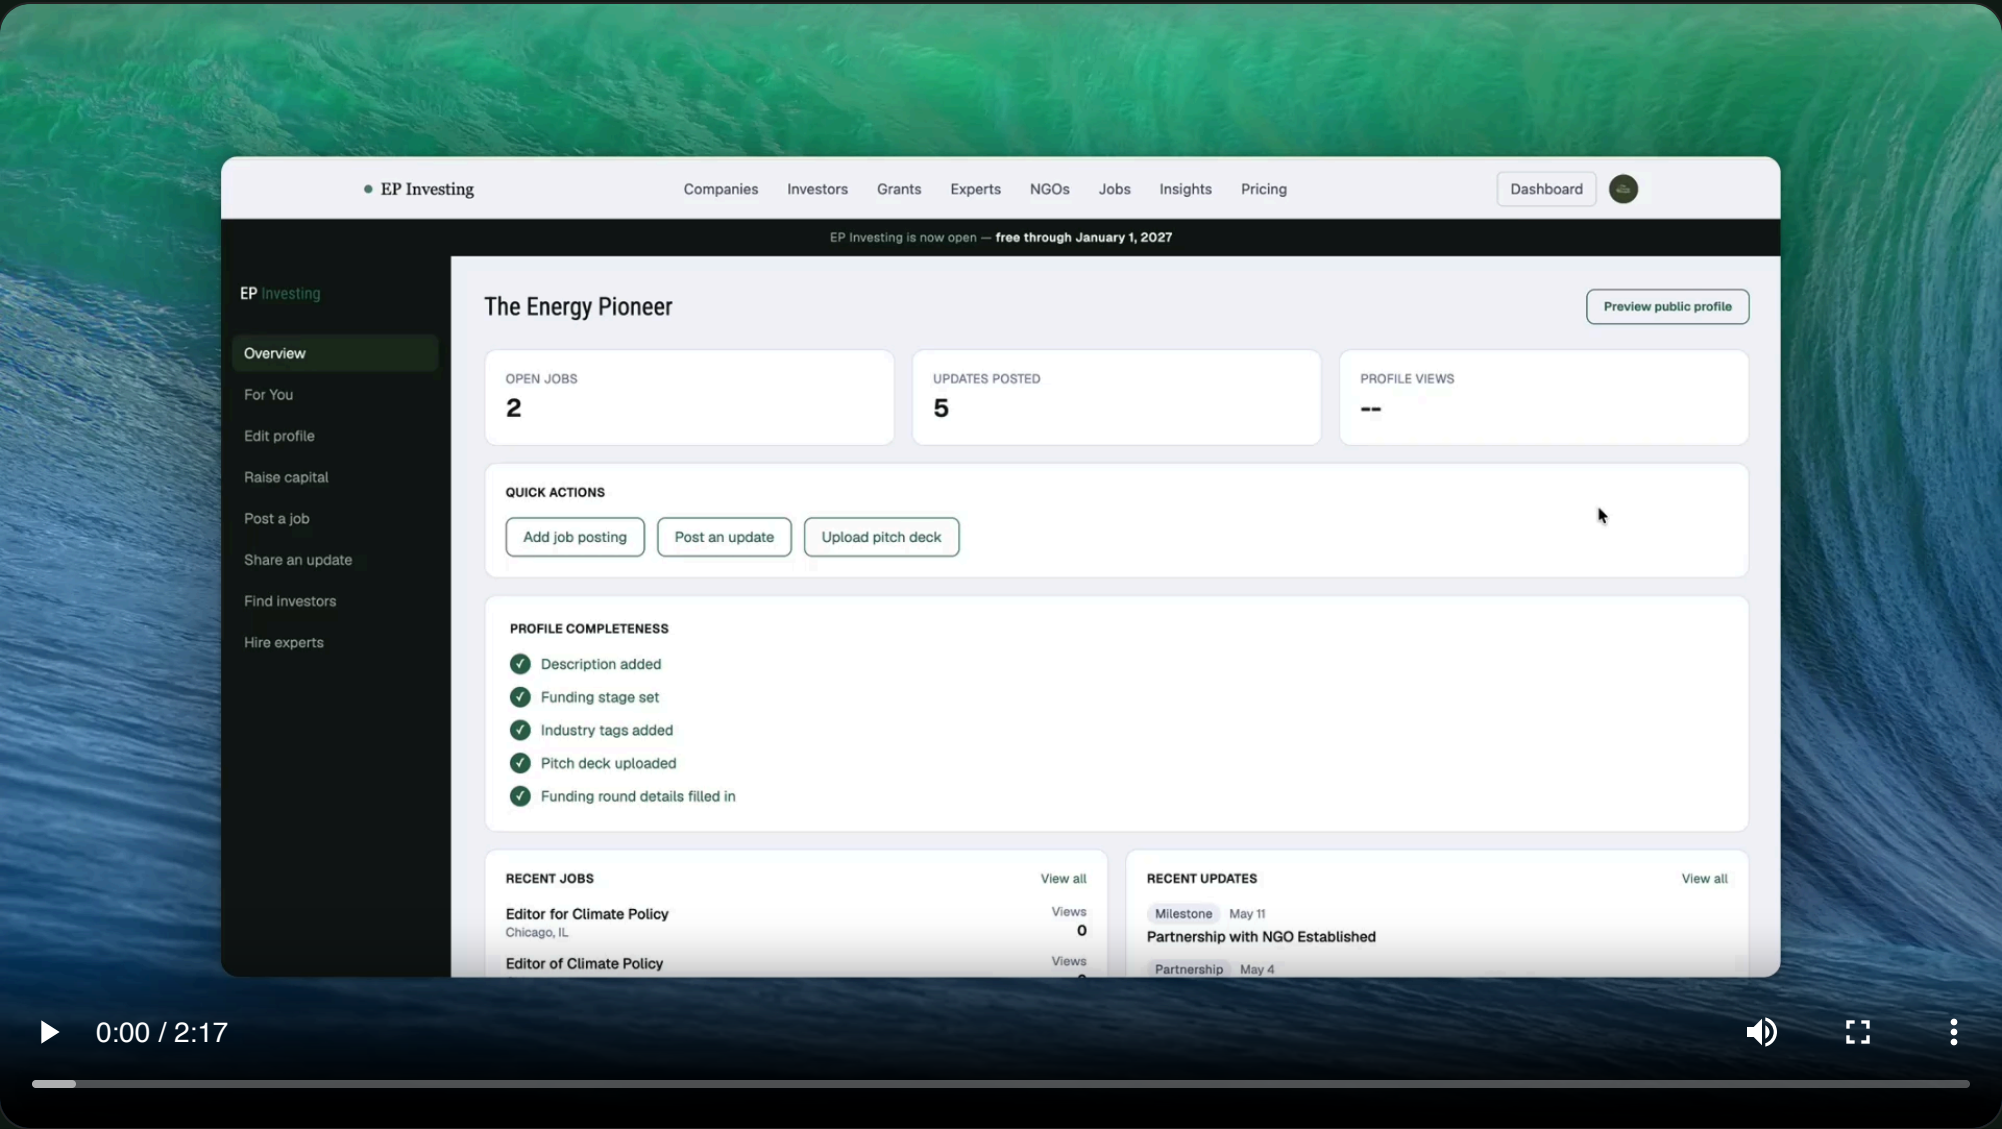

From claimed to live in minutes.

Find your company, claim it, customize the profile — key figures stay locked for trust. Then explore matching, news, and grants.

Claim → customize → discoverable

Locked financials keep the data credible

► Press play – EP Investing dashboard overview

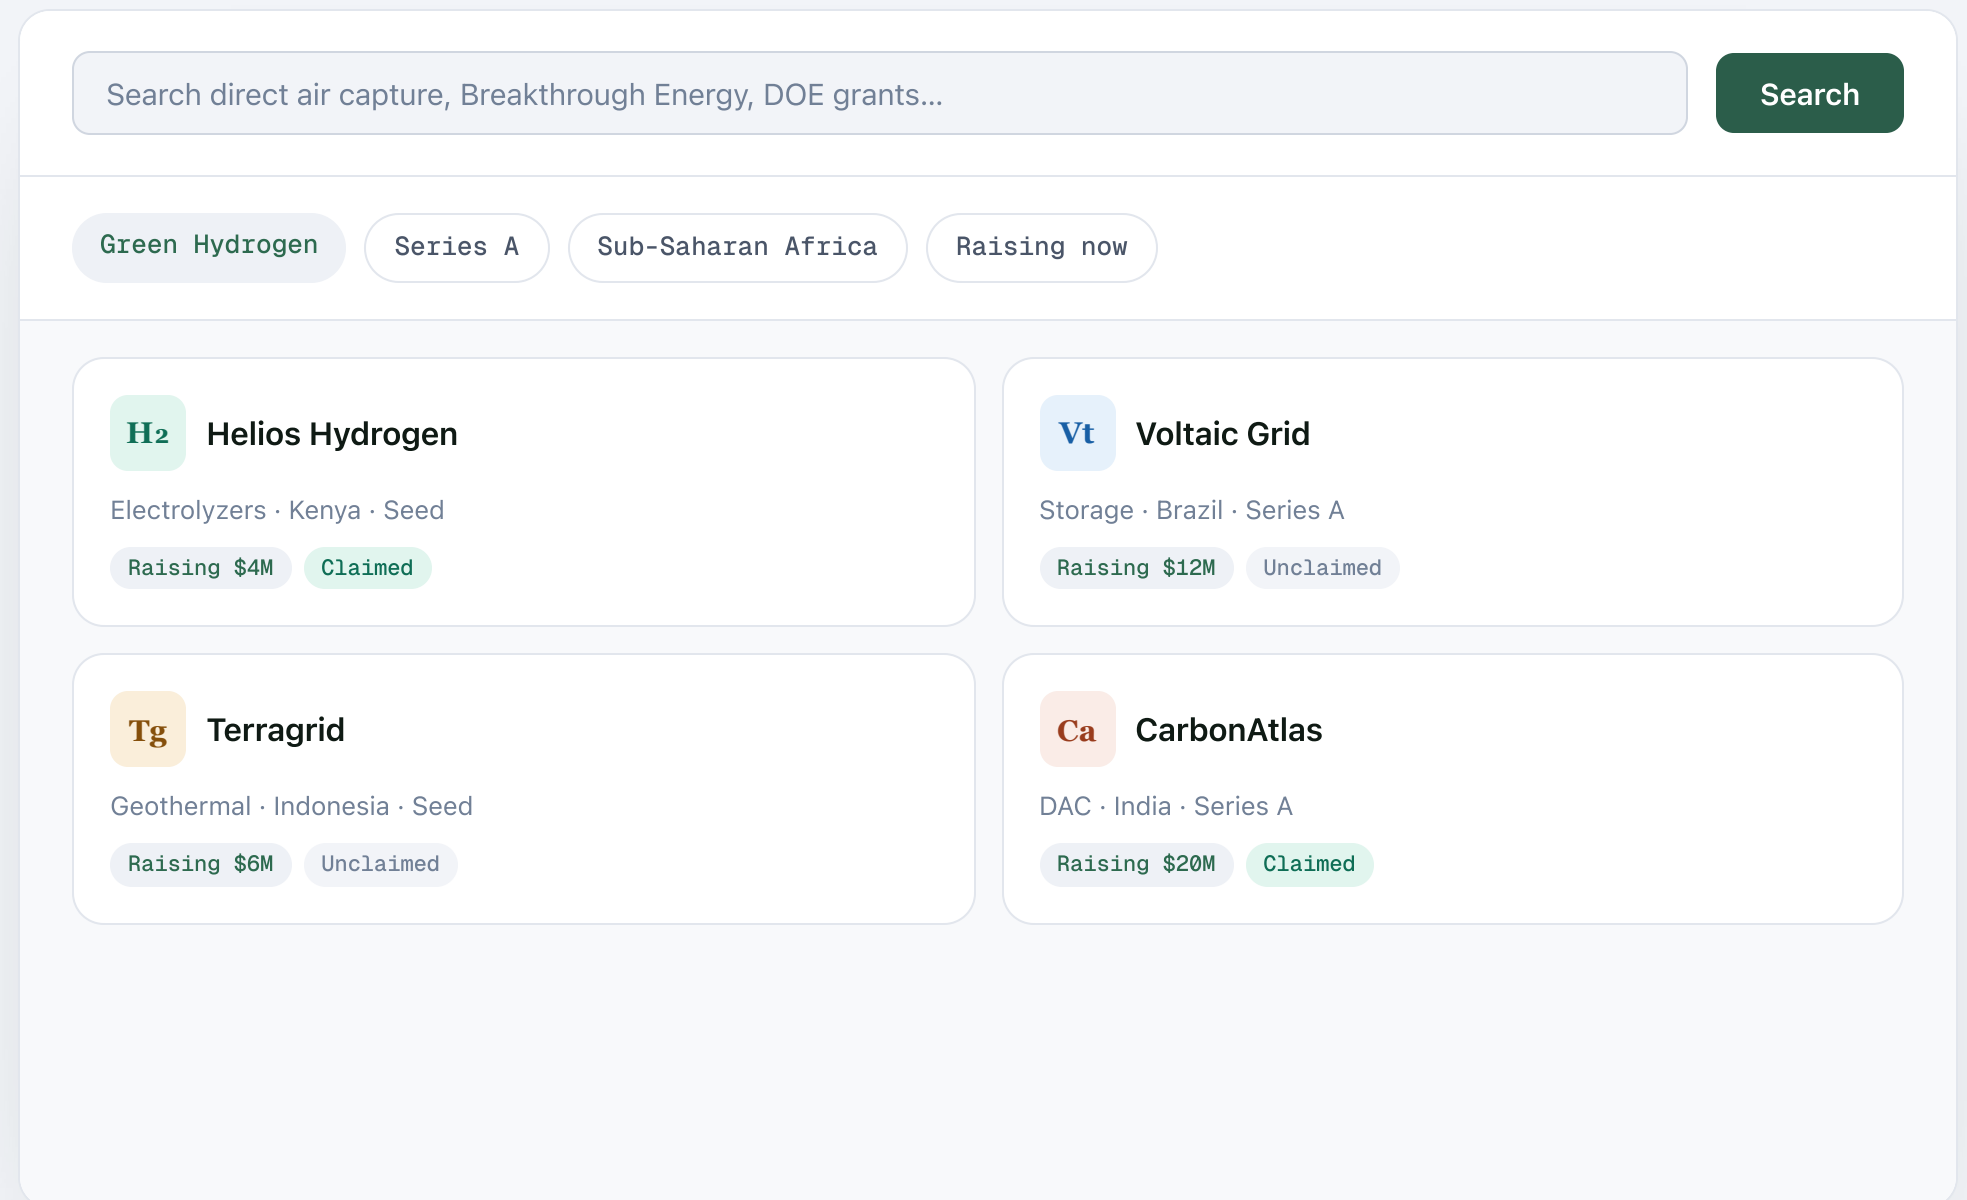

11 • PRODUCT • CAPITAL ↔
COMPANIES

Every listing is a potential customer.

Investors browse 1,300+ companies and 350+ funds, filter by sector and stage, and request a warm intro. We facilitate — and both sides become paying members.

1,300+ **350+**
companies listed investors listed

Global from day one — by design.

Because the newsroom is already read in 100+ countries, demand finds us. We turn that reach into supply with one repeatable move:

THE CONTACT → LISTING LOOP

A contact mentions their company → we add it to the platform → it becomes a live, valuable profile → that profile becomes our sales pitch back to them.

PHASED EXPANSION

2027/28
PHASE 1

US & Europe

Anchor companies and investors in the deepest capital markets first.

2030
PHASE 2

Asia, Africa & Latin America

Scale into the highest-growth transition markets worldwide.

Where the platform compounds next.

Once the network is dense and global, the same engine opens three larger frontiers — each building on the data, distribution, and trust we've already earned.

01

Decentralized investment fund

Stand up an EP-backed fund to invest directly into the companies on the platform — turning proprietary deal flow into returns and aligning us with the network's winners.

02

Large-scale project capital

Source and syndicate capital for utility- and commercial-scale renewable projects — moving beyond company seats into the much larger pool of project finance.

03

Adjacent tech verticals

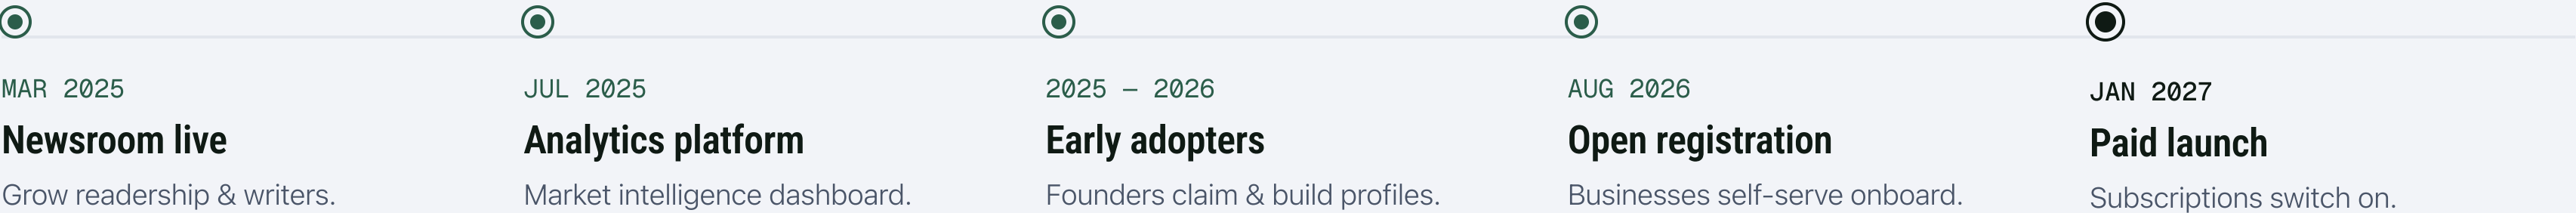

Replicate the EP Investing playbook in new frontier markets — a dedicated platform for space technology, AI applications, and other emerging deep-tech sectors.

- Optionality, not commitment

Each frontier reuses the same network, data, and brand — high upside, low marginal cost.

Free to grow, then paid.

The proven consumer-tech sequence: win users and density first, monetize second. We're in the build phase now — paid subscriptions switch on at official launch.

Two waves of seats, one recurring engine.

EARLY ADOPTERS • LAUNCH REVENUE

COMPANIES

\$99 / seat · month

Access to ~\$680B in private capital, investor matching, expert hiring, and curated sector intelligence.

INVESTORS

\$149 / seat · month

Deal flow across 1,300+ companies not on traditional platforms, plus high-growth market intelligence by sector and region.

EXPANDING POOL • GROWS WITH THE NETWORK

NGOS

\$99 / seat · mo

Mission-driven orgs sourcing partners, funding, and talent across the transition.

EXPERTS

\$49 / seat · mo

Advisors and specialists getting discovered, hired, and connected as the network scales.

- Free until Jan 1, 2027
- Early adopters seed revenue; NGOs and experts compound it as the network grows.

A revenue seed, then scale.

2027 • FIRST PAID YEAR

\$48K

20 investor subscribers
100 startup subscribers
Converted from free early adopters

2028 – 2032 • AT SCALE

\$7.5M

1,000 investor subscribers 5,000 startup
subscribers Annual recurring revenue

WHAT DRIVES IT

- Free base converts at launch
- Newsroom feeds zero-CAC growth
- Each region multiplies supply & demand

Illustrative projections – to be finalized with updated traction figures.

Pre-revenue, but not pre-asset.

We're raising before paid launch, so we value EP on what already exists — three real assets — using a comparable pre-seed method, not a DCF.

ASSET 01

Platform & data

A structured directory of 1,300+ companies, 350+ investors & matching tech.

ASSET 02

Owned audience

The Energy Pioneer — 100+ countries, 28 languages, growing +100/day.

ASSET 03

Warm pipeline

Several hundred prospects plus journalist access competitors can't buy.

METHOD

Scorecard against comparable pre-seed climate + media startups, which price in the **\$1M–\$2.5M** pre-money range.

ILLUSTRATIVE TERMS

Post-money	\$1.5M
Raise	\$100K
Equity	≈6.7%
Buy-back	Company option after 24 months

Illustrative – exact figure to be set together.

\$100K

to compound a lead we already have.

Equity, with a company buy-back option after two years.
Raised from family & friends who want in before paid launch.

USE OF FUNDS – 50 / 50

Team

50%

Existing salaries plus a contract sales lead and a contract tech expert — both on a trial basis to prove ROI.

Tech & growth

50%

Technical build, growing the newsroom and paying writers, and marketing to convert the warm pipeline before launch.

Build the network **with us.**

We have the audience, the data, and the early users. \$100K turns a quiet head start into a defensible lead before paid launch.

FOUNDING TEAM

Otto Gunderson — Founder & CEO **Genevieve Mallet — Executive Editor, The Energy Pioneer** **Noah Ginsburg — Sales Lead (North America) (joining with this raise)** **Alex Crutchfield- Sales Lead (Europe)- (joining with this raise)**
